2017 DEVELOPMENTS

A year of strategic repositioning

Managed migration of balance sheet to lower risk lending complete

- Motor lending migrating towards lower yield, lower risk prime lending with a reducing exposure to sub-prime lending
- Decision to not engage in parts of SME markets exhibiting signs of overheating
- Sale of PLD Following the sale of the unsecured personal loan portfolio, PLD in December, the Group has no exposure to sub-prime unsecured personal lending

Deposits platform – Investment complete

- Provides a wider range of retail funding options including ISAs and easy access accounts
- Flexibility will deliver access to a wider range of funds at lower rates
- Focus on enhancing customer proposition and operational efficiencies through full online self-servicing

Investment in business growth and leadership

- Significant investment in new leadership in the Motor Finance business with a new MD and FD appointed and in place
- 2018-20 plan includes plan to deliver, prime and near-prime products and services in the Motor lending market through a new Motor Finance lending platform
- Continued focus on growth in the Real Estate Finance business which has significant scope due to the continuing shortage of new housing stock in the UK
- Consumer Mortgage platform to deliver enhanced new products to a wider customer base as well as providing the capability to fund partner front book originations

IFRS 9 impact

- IFRS 9 successfully implemented in 2017
- This standard changes the timing of provision recognition rather than the overall levels of impairment losses, resulting in a one-off impact to reserves in the range £22m – £27m
- This impact is offset by transitional relief for capital purposes which allows 95% to be added back in 2018

STRATEGY

Very significant shareholder value created since 2011 IPO

- **£240.8m** capital generated since IPO
- Consistently strong dividend payment pattern
- Capital remains strong with Common Equity Tier 1 ratio of 16.5%
- Leverage ratio of 12.3% well above the PRA minimum
- Equity per share at IPO **£1.66**
- Equity per share at FY 2017 of £13.10 (689% increase on equity per share at IPO) after £5.21 was paid to shareholders by way of dividends

*ELG: Everyday Loans Group.

STRATEGY

Growth and diversification

Investment

- Investing in new platforms to provide future expected customer service
- Realising benefits of previous investments such as new Deposits platform, Commercial Finance platform and Consumer Mortgages platform

Leadership

Continue to refresh expertise in our core businesses including recruiting highly experienced leaders with a history of strong business performance

24% increase in net interest income

• Maintaining strong growth in both Consumer Finance and Business Finance sectors whilst moving to lower risk, lower margin lending. This increase is lower than the growth in impairments due to the curtailment of writing sub-prime business in 2017

Impairment losses up 44%

- Loan impairments have increased year on year, partly as a result of increased lending balances (+27%) and increased provisions in respect of the sub-prime Motor Finance legacy book which also shrank in the period due to STB's exit from that sector of the Motor market
- Impairments in Business Finance remain modest

Operating expenses up 11%

- Reflecting continuing investment in people, leadership, infrastructure, new Deposits platform and the mortgage proposition
- Regulatory compliance remains a disproportionately high cost
- Proposed FY dividend per share up 5%
 - FY 2016 included a special interim dividend of **165p** paid in July 2016 following ELG disposal. Interim dividend of **17p** paid in September 2016 and proposed final dividend of **58p** per share

IFRS 9

Impact of the new accounting standard on results

Significant changes brought about by IFRS 9

- Requires accounting for impairment losses on an expected rather than incurred loss basis
- Introduces much higher up front levels of provision for expected losses, while not affecting the overall impairment losses expected over the lifetime of a loan
- No impact on actual cash flows received
- Successful delivery of the Finance and Risk systems required for this accounting

Impact on opening distributable reserves

- Impact of the initial transition is passed through opening distributable reserves
- The estimated impact (net of tax) is a reduction of distributable reserves in the range of £22m to £27m primarily driven by Motor Finance and Retail Finance
- This reduction affects CET 1 capital, but transitional relief agreed by regulators allows 95% to be added back in 2018 and the following amounts to be added back in future years:

BUSINESS TO BUSINESS FEEDBACK

Commercial Finance

Having built our reputation successfully in the theatre and entertainment industry, working on some of the most well-known productions, we recognised the opportunity to restructure our business and drive further growth. With plans to expand our geographical presence in the near future, we needed a financial partner capable of producing an innovative financial solution.

We had developed a long-term relationship with the team at Secure Trust Bank, who were approachable and understood the workings of our business. As a result, they were able to provide a tailored financial package that worked alongside our expansion objectives over the next three years. **99**

Maria Townsend, Chief Executive, Stage Electrics

Real Estate Finance

It is essential to us that our funder provides a facility with the flexibility to quickly adapt our business model to changing market conditions. Secure Trust Bank did that at the outset tailoring the facility to our needs giving us the ability to offer a Plan B when necessary. We were able to build a close relationship with the team at Secure Trust Bank ensuring a quick and smooth process both in closing and then in managing our facility. **99**
